

Flat Rock Creek

15 mins

Moderate track

3

294 m Return

↑ 21m

This short walk explores a piece of the Royal National Park, with lovely wildflowers in spring, and some great sandstone rock formations. The main highlight is the creek. Flat Rock Creek, as the name suggests, has a solid and flat bed. The rock is red in colour and the water flows across the width of the creek. This spot is great on a sunny day to contrast the blue sky with the red rock.

Are you ready to have fun?

Please ensure you and your group are well prepared and equipped for all possible hazards and delays. Check park closures, weather information and Fire Danger Rating before setting out. Optional side trips and alternate routes noted are not included in this walk overall grade, length or time estimate. Please allow extra time for resting and exploring areas of interest. The authors, staff and owners of wildwalks take care in preparing this information but will not accept responsibility for any inconvenience, loss or injury you may experience. Please take care, have fun - Happy Walking.

Getting there Traveling by car is the only practical way to get to Flat Rock Creek Car Park (gps: -34.1142, 151.0662). Car: A park entry fee is required for driving into the park. This is a return, so you will finish back at the start.

Find up to date and more information including; travel directions, weather, park closures and walker feedback at <http://wild.tl/frc>

0 | Flat Rock Creek Car Park

(150 m 3 mins) From the Flat Rock Creek car park (West of Flat Rock Creek bridge, 6.6KM south of Audley on Sir Bertram Stevens Dr), this walk follows the track past the 'Flat Rock Creek' sign. Following the arrow down the rock the walk then winds through the bush passing some interesting rock formations and views of the creek. Just near the creek the track heads right to come to the bank of Flat Rock Creek. (The creek may be impassable after rain, and is slippery).

0.15 | Flat Rock Creek

Flat Rock Creek is found south east of Audley and flows north under Sir Bertram Stevens Drive. In places the water is wide and shallow as it flows across the solid flat rock bed. The red rock and the shallow creek make for a very interesting environment. It is a nice cools spot to visit on hot days.
